Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant’s arguments and in light of the prior art made of record, claims 1-2, 4-6, and 8-12 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner’s statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose an apparatus and method for reducing noise in a video distribution comprising the steps of applying motion compensated temporal filtering to compressed image data using motion vectors previously generated during compression of the image data, “wherein the filtering is adapted to reduce noise in said compressed image data, the need for regeneration of said motion vectors during said filtering step is eliminated, adaptive spatial filtering is applied to compressed image data, and a lookup table is provided for determining values for B (backward) and B(forward), corresponding to values between 0 and 1, based on a difference of pixel amplitudes. The prior art further fails to teach or suggest “calculating a proportional value of a following anchor frame pixel value and the current frame pixel value to assign to a calculated current frame pixel value, by applying an
arithmetic manipulation of their respective amplitude values along with the numerical values of \(B\) (backward), \((1- B\) (backward)), and the amplitude of the pixel located within a second frame offset by representative motion vectors, and summing the resulting proportional value of the respective anchor frame pixels with the proportional value of the current frame pixel to obtain a single calculated pixel amplitude value".

It is noted that the closest prior art of record (Ding US Patent no. 6005626) teaches a similar apparatus and method for reducing noise, however, Ding fails to teach or suggest claimed limitations as specified and quoted above.

**Conclusion**

3. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
